REDACTED FOR WEB

ABOUT ME

I am a team-oriented Full Stack Software Engineer with a passion for crafting highly efficient, wildly performant applications with a strong desire to tackle the most challenging projects. I have a proven track record of delivering innovative solutions and optimizing system architecture across diverse software applications. I am extremely skilled in leading engineering and product teams to excel in the growth of business while fostering a collaborative and knowledge-sharing environment. I am seeking an opportunity to leverage my expertise in software engineering in order to drive impactful results for a visionary organization. If you need someone that can take any problem and craft the perfect solution, I am that person.

EXPERIENCES SO FAR...

FULL STACK / SENIOR ENGINEER / TEAM LEAD

Pvolve // April 2022 - *Current*

- Successfully leading a team of skilled engineers in the development of the e-commerce frontend with a noticeable increase in conversion rates. Leveraging cutting-edge Shopify performance techniques and features.
- Comprehensive oversight and delivering effective solutions across various teams and codebases within the organization. This includes providing support to backend, streaming, and mobile operations, ensuring smooth and efficient functioning.
- Architecting interesting solutions with a focus on reusability and performance to support a streaming subscription system that is accessed through web and mobile, as well as making sure teams follow security best practices.

SENIOR CONSULTANT / ENGINEER

CapGemini // October *2021 - April 2022*

- Collaborated closely with cross-functional teams, including designers, product managers and client executives to gather requirements and deliver exceptional, user-centric solutions in a timely manner.
- Implemented robust security measures and payment gateways to safeguard customer data and ensure a secure shopping environment while implementing better logging systems using enterprise solutions.
- Orchestrated the end-to-end architecture, development, and maintenance of a cutting-edge deferred payment solution, catering to one of the largest financial institutions in North America.

FULL STACK DEVELOPER

Independent Contractor // *September 2015 - October 2021*

- Leveraged cutting-edge marketing technology tools and platforms to automate and streamline marketing campaigns, increasing campaign efficiency and ROI.
- Led performance optimization efforts, achieving notable reductions in page load times and enhancing overall website responsiveness, leading to improved user satisfaction and retention.
- Received accolades from clients for delivering products that significantly improved their conversion rates, customer experience and even through powerful solution engineering
- Collaborated with cross-functional teams to integrate third-party APIs and services, expanding the company's product offerings and enhancing overall system capabilities.
- Actively researched and implemented emerging technologies, such as serverless architecture and containerization, resulting in increased scalability and cost-effectiveness.
- Spearheaded A/B testing initiatives to optimize website conversions, resulting in a significant increase in user engagement and conversion rates.

INFORMATION TECHNOLOGY SPECIALIST

Dirtmasters // *January 2013 - February 2020*

- Successfully managed and executed multiple IT projects, ensuring on-time delivery, adherence to budget constraints, and seamless integration of new technologies.
- Played a key role in identifying IT needs, implementing scalable solutions, and optimizing processes, resulting in increased productivity and operational cost savings.
- Exhibited adaptability and versatility, seamlessly transitioning between IT and managerial roles, demonstrating a diverse skill set and ability to thrive in dynamic environments.
- Demonstrated exceptional problem-solving skills, swiftly addressing challenges and obstacles, and proactively identifying innovative solutions for optimal project outcomes.
- Proven ability to bridge the gap between technical and non-technical stakeholders, effectively communicating project requirements, progress, and outcomes to diverse audiences.
- Drove process improvements and implemented best practices to enhance project delivery, resulting in streamlined workflows and increased client satisfaction.
